

Asthma Rescue Kit™ Seamless transition from one mode of therapy to another. Across the continuum of care.

The Asthma Rescue Kit™ is an aerosol delivery system for the severe asthmatic that seamlessly transitions between all modalities of aerosol therapy. Based on the Medicator® Aerosol Maximizer high-efficiency aerosol drug delivery system and nebulizer, with Möbius™ aerosol and medical gas delivery technology, provides:

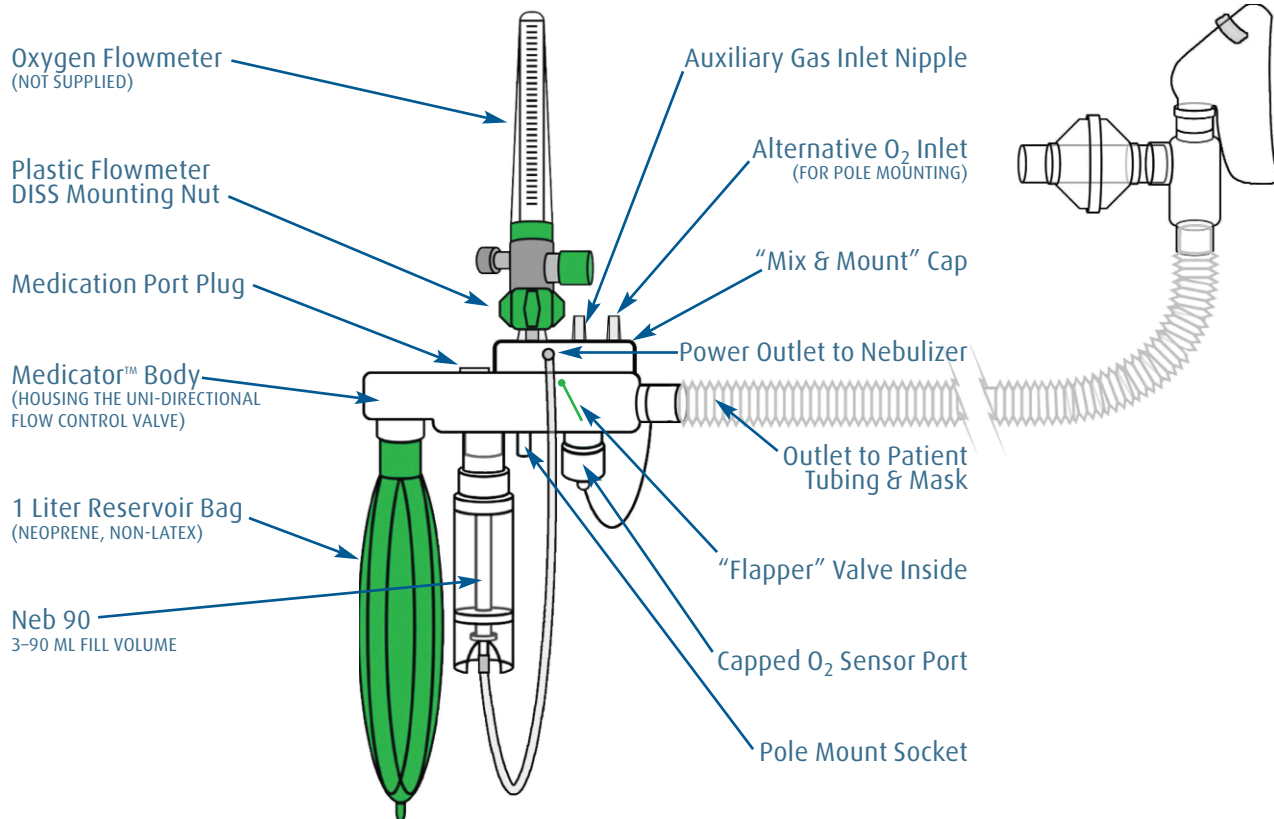

- Individual unit dose treatments
- Continuous nebulization therapy
- Easy addition of Heliox any time
- A nebulizer characterized for heliox operation

For technically demanding aerosol and medical gas therapy.

A simple, classic principle that really makes sense: integral reservoir bag enhances aerosol drug delivery and compensates for a six foot delivery tubing and for driving the nebulizer with heliox and oxygen mixture.

AEROSOL & MEDICAL
GAS DELIVERY TECHNOLOGY
BY HEALTHLINE MEDICAL

Closed, low-flow, zero-resistance system with integral exhalation filtration offers many benefits, including:

- Low flow, no air entrainment
- Reservoir bag that meets inspiratory demands with minimal gas usage
- A soft, comfortable, *portless* vinyl mask
- Technology that conserves expensive heliox, requires only 80/20 mix
- Technology that conserves medication usage; reduces waste
- The use of heliox that reduces turbulence and work-of-breathing
- A high FIO₂ when used without heliox (>0.90)
- The use of helium from 50-80% using 80/20 mixture
- Maximum heliox consumption only 8 L/min
- Built-in filtration that protects against inhaling second-hand drugs
- Built-in filtration that protects therapist from exhaled patient droplets
- A mask configuration that is easily switched to mouthpiece
- A solution that is more versatile and cost-effective than competing devices
- Lower total-cost-of-use per ER visit than conventional devices
- A flowmeter or pole mount with built-in O₂ analyzer port
- Ready-to-use packaging hang bag with optional Peak Flow Meter
